Top Quality Diagnostic Imaging Service

Western Australia received a further health boost today when SKG Radiology became an accredited diagnostic imaging service, recognising the quality and safety of their service.

SKG Radiology has been awarded accreditation by *Quality Innovation Performance Limited (QIP)*, which is part of Australia's leading accreditation company managing programs for diagnostic imaging, dentistry, retirement villages, physiotherapy and general practice accreditation.

QIP Chair, Gary Smith, said achieving accreditation demonstrates that the service makes a significant investment in quality on a day-to-day basis from the top down.

“Accreditation is a major achievement and is a clear demonstration that SKG Radiology is constantly striving to improve their level of service to their referrers, patients and the community,” he said.

“SKG Radiology seeks accreditation through QIP because they want to be the best and this is another step towards excellence.”

The QIP Accreditation framework is based on national standards that are set by the Commonwealth Department of Health.

Accreditation is a program that aims to provide a range of guarantees to referrers and patients by accrediting the environment of the service.

To achieve this endorsement, SKG Radiology has demonstrated that they meet all standards set by the Commonwealth Department of Health.

Tim Tidman, Chief Operations Manager said accreditation was attained through the cooperation and communication among staff members.

“Everyone in the practice played a valuable role in ensuring we met the standards. The recognition of working in an accredited practice gives our dedicated staff a feeling of prestige,” said Zoe Stone, Quality Manager.

Media Release

SKG Radiology is proud to confirm they display the QIP accreditation logo at their practice.

“We want to communicate to our patients that their well-being is our priority. QIP Accreditation assures referrers and patients we are committed to providing care which meets the standards,” said Zoe Stone, Quality Manager.

SKG Radiology offers a range of diagnostic imaging services including: MRI, PET-CT, LOW DOSE CT, Ultrasound, Nuchal Translucency, Doppler, Nuclear Medicine, Fluoroscopy, Mammography, Interventional Radiology, General X-ray, Dental X-ray (OPG), FNA Biopsy, Bone Densitometry.
